

Final Project Proposal

Front-End Development
Shelda Eason, student

For my final project, I will be designing and building a website portfolio showcasing my work as a UX Designer.

Elements within code will help me build a website that allows me to utilize HTML/CSS/Javascript concept taught throughout the curriculum.

There will be a total of 10+ pages. Project requirement are as follows:

Main page

- User will be able to brows projects from a carousel using breadcrumbs to advance to each project.
- UX Process will contain interactive elements that highlight each stage.
- Industries will feature interactivity when clicking each title. Text will appear over the image, which will create a darker overlay on top of the image for legibility.

About Me page

- Carousel of things I love.
 - Pics of my pet dogs
 - Cooking

Work page

- Carousel of interactive prototypes.
- Thumbnails of additional projects are featured underneath carousel for the user to continue exploring within the experience.

UX Process page

- No special interactivity on this page.

Contact page

- Form fields will allow user to send a note.

Resume page

- User will be able to download my resume.
